

My Projects

[Main Page](#) [My Projects](#) [My Hobbies](#) [Contact Me](#)

Take a look at some of the projects I am working on:

Growing a tomato plant

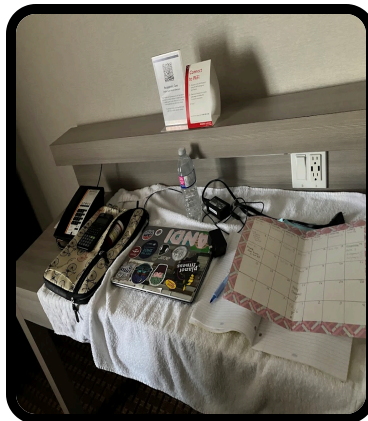

I started this tomato plant from seed last spring. It has grown so tall it is now touching the ceiling. The plant has produced cherry tomatoes and they are incredibly sweet.

The tomato plant alongside some of my other plants.

Finishing a second degree

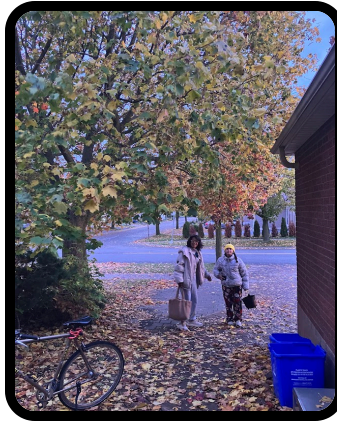

I was accepted into the accelerated Computer Science program at Algoma U. My first degree was a BA in Political Science at York University. I consider this to be a project of mine because I work very hard at it. I do not come from a coding or math background so it has been very challenging for me.

My laptop and school calendar on a hotel desk.

Planning a family party

I am planning a family party for this year's Family Day. I am going to introduce my partner to my family for the first time. My grandma is ordering traditional Caribbean food for the gathering. I am very excited!

This is a picture of my mom and little sister on Halloween in Toronto.

Starting a running group

I have moved a lot in the past few years but I have finally found myself somewhat settled in a small town in Saskatchewan. I decided to start a running group here to make some new friends. The group is called Kilometres and Friends.

This is the custom hat that I had made at the West Edmonton Mall for our group.
